

a**DDR fraction within each proteomic assay**

Whole proteome Lactylome (Kla)

Source-balanced contrasts; study-clustered CR2 / BH q. ns: $q \geq 0.05$.
Dots and n retain frozen display rows; reused references count once in tests.

b**Cell proliferation score
28 independent RNA materials**

Source-balanced contrasts; study-clustered CR2 / BH q. ns: $q \geq 0.05$.
Material median of the 196-gene Hallmark G2M mean $\log_2(\text{TPM} + 0.5)$.
