Lactylation regulator expression and DDR protein fractions

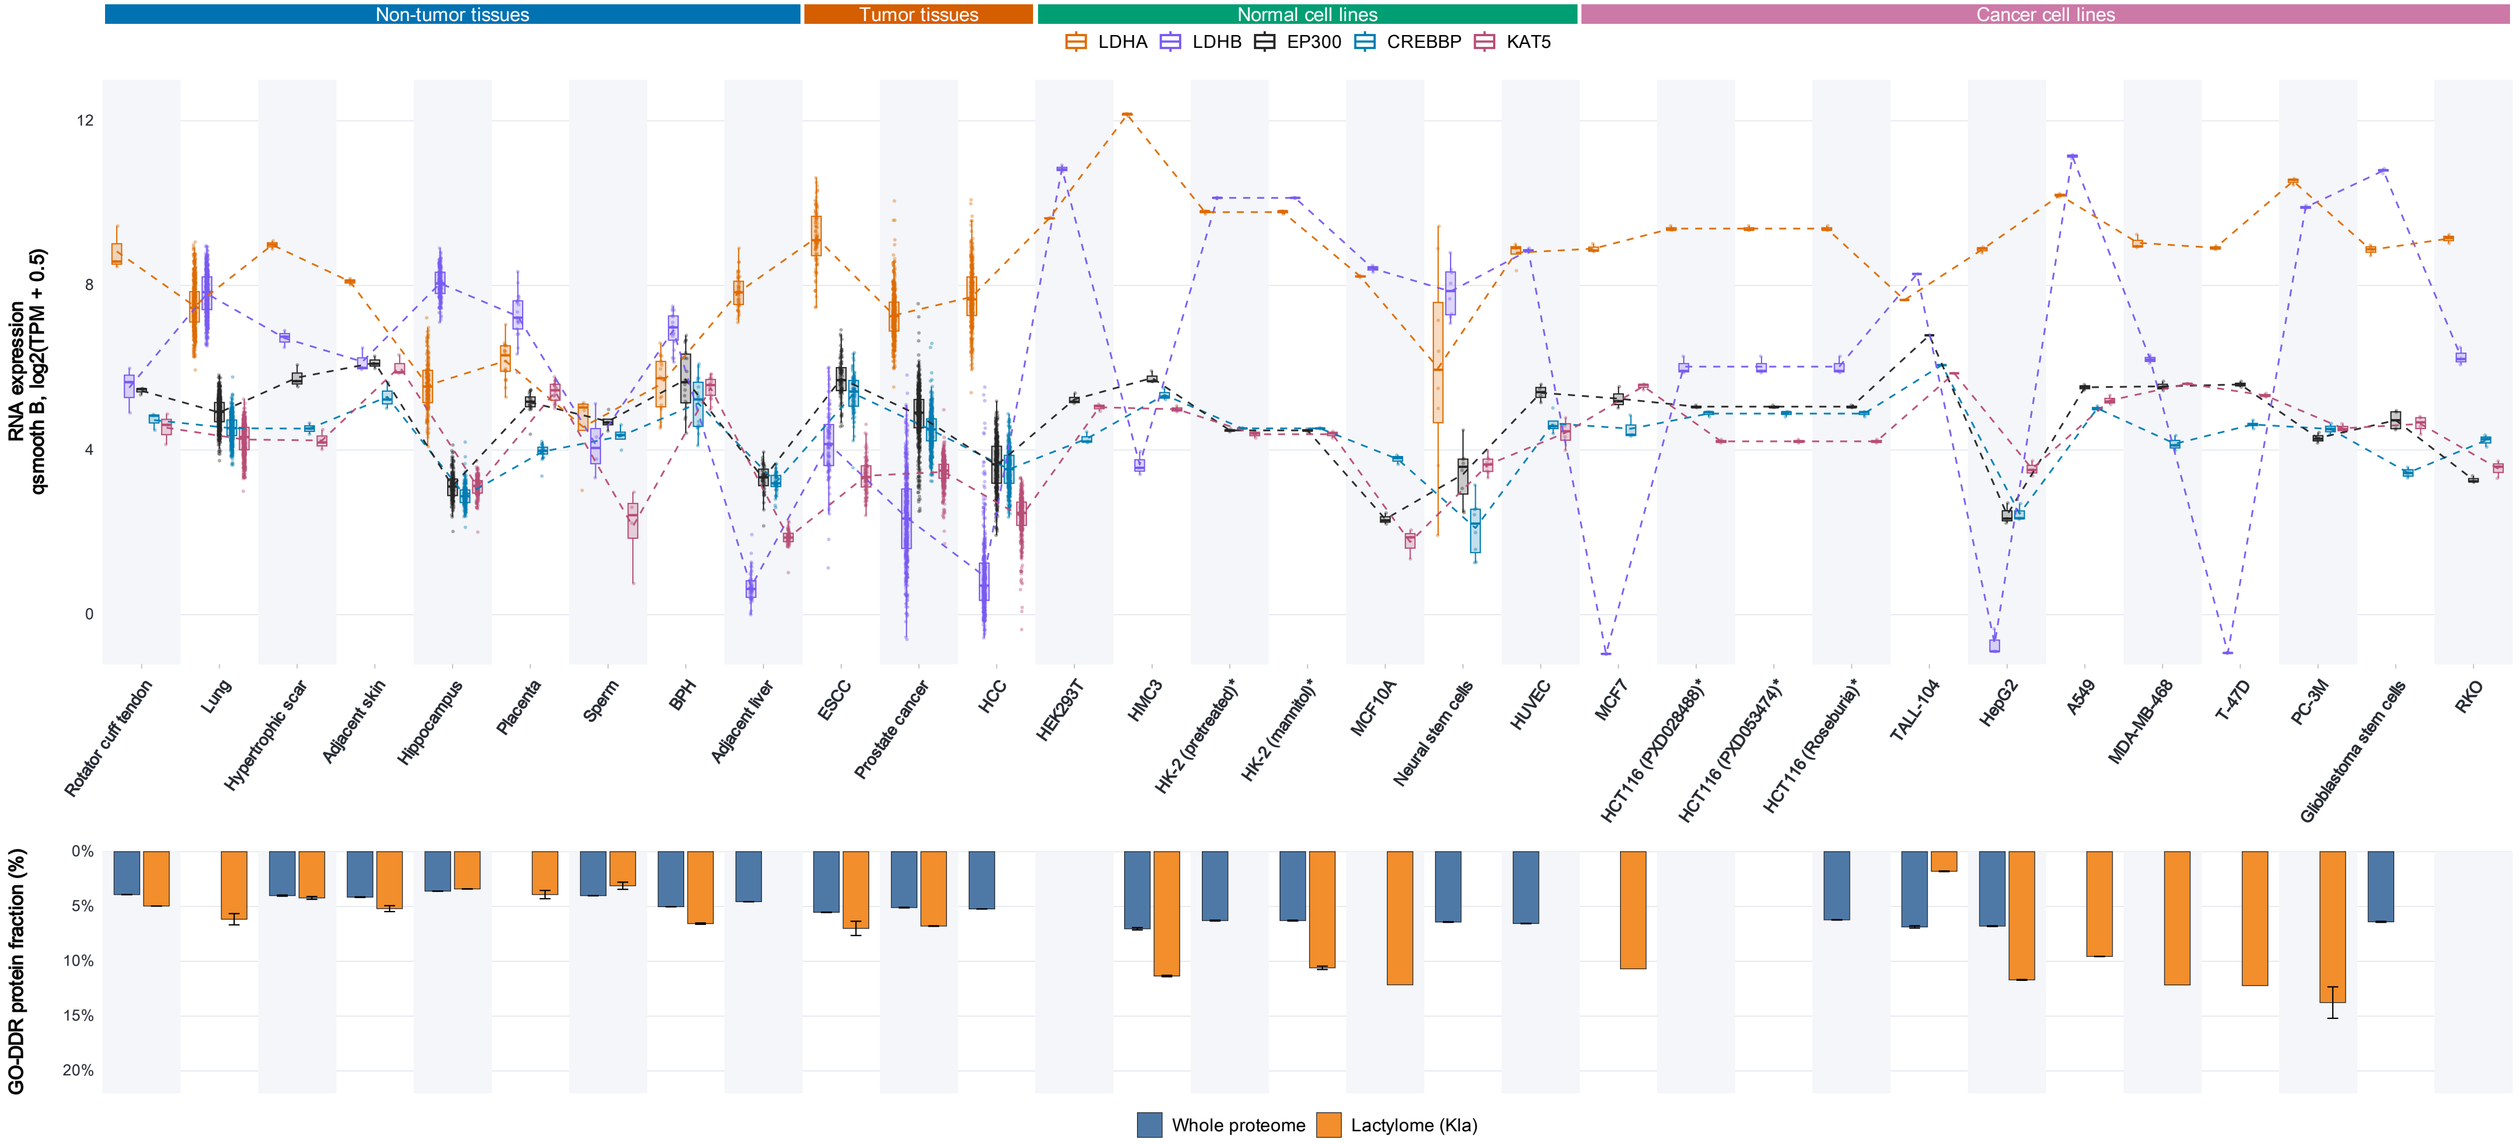

RNA: boxes show median and IQR; whiskers extend to 1.5 x IQR. Points are sample records; dashed lines connect material-level means.

DDR: downward bars show mean percentages; error bars show SEM (n > 1). Blank positions indicate no sample-level observation for that modality.

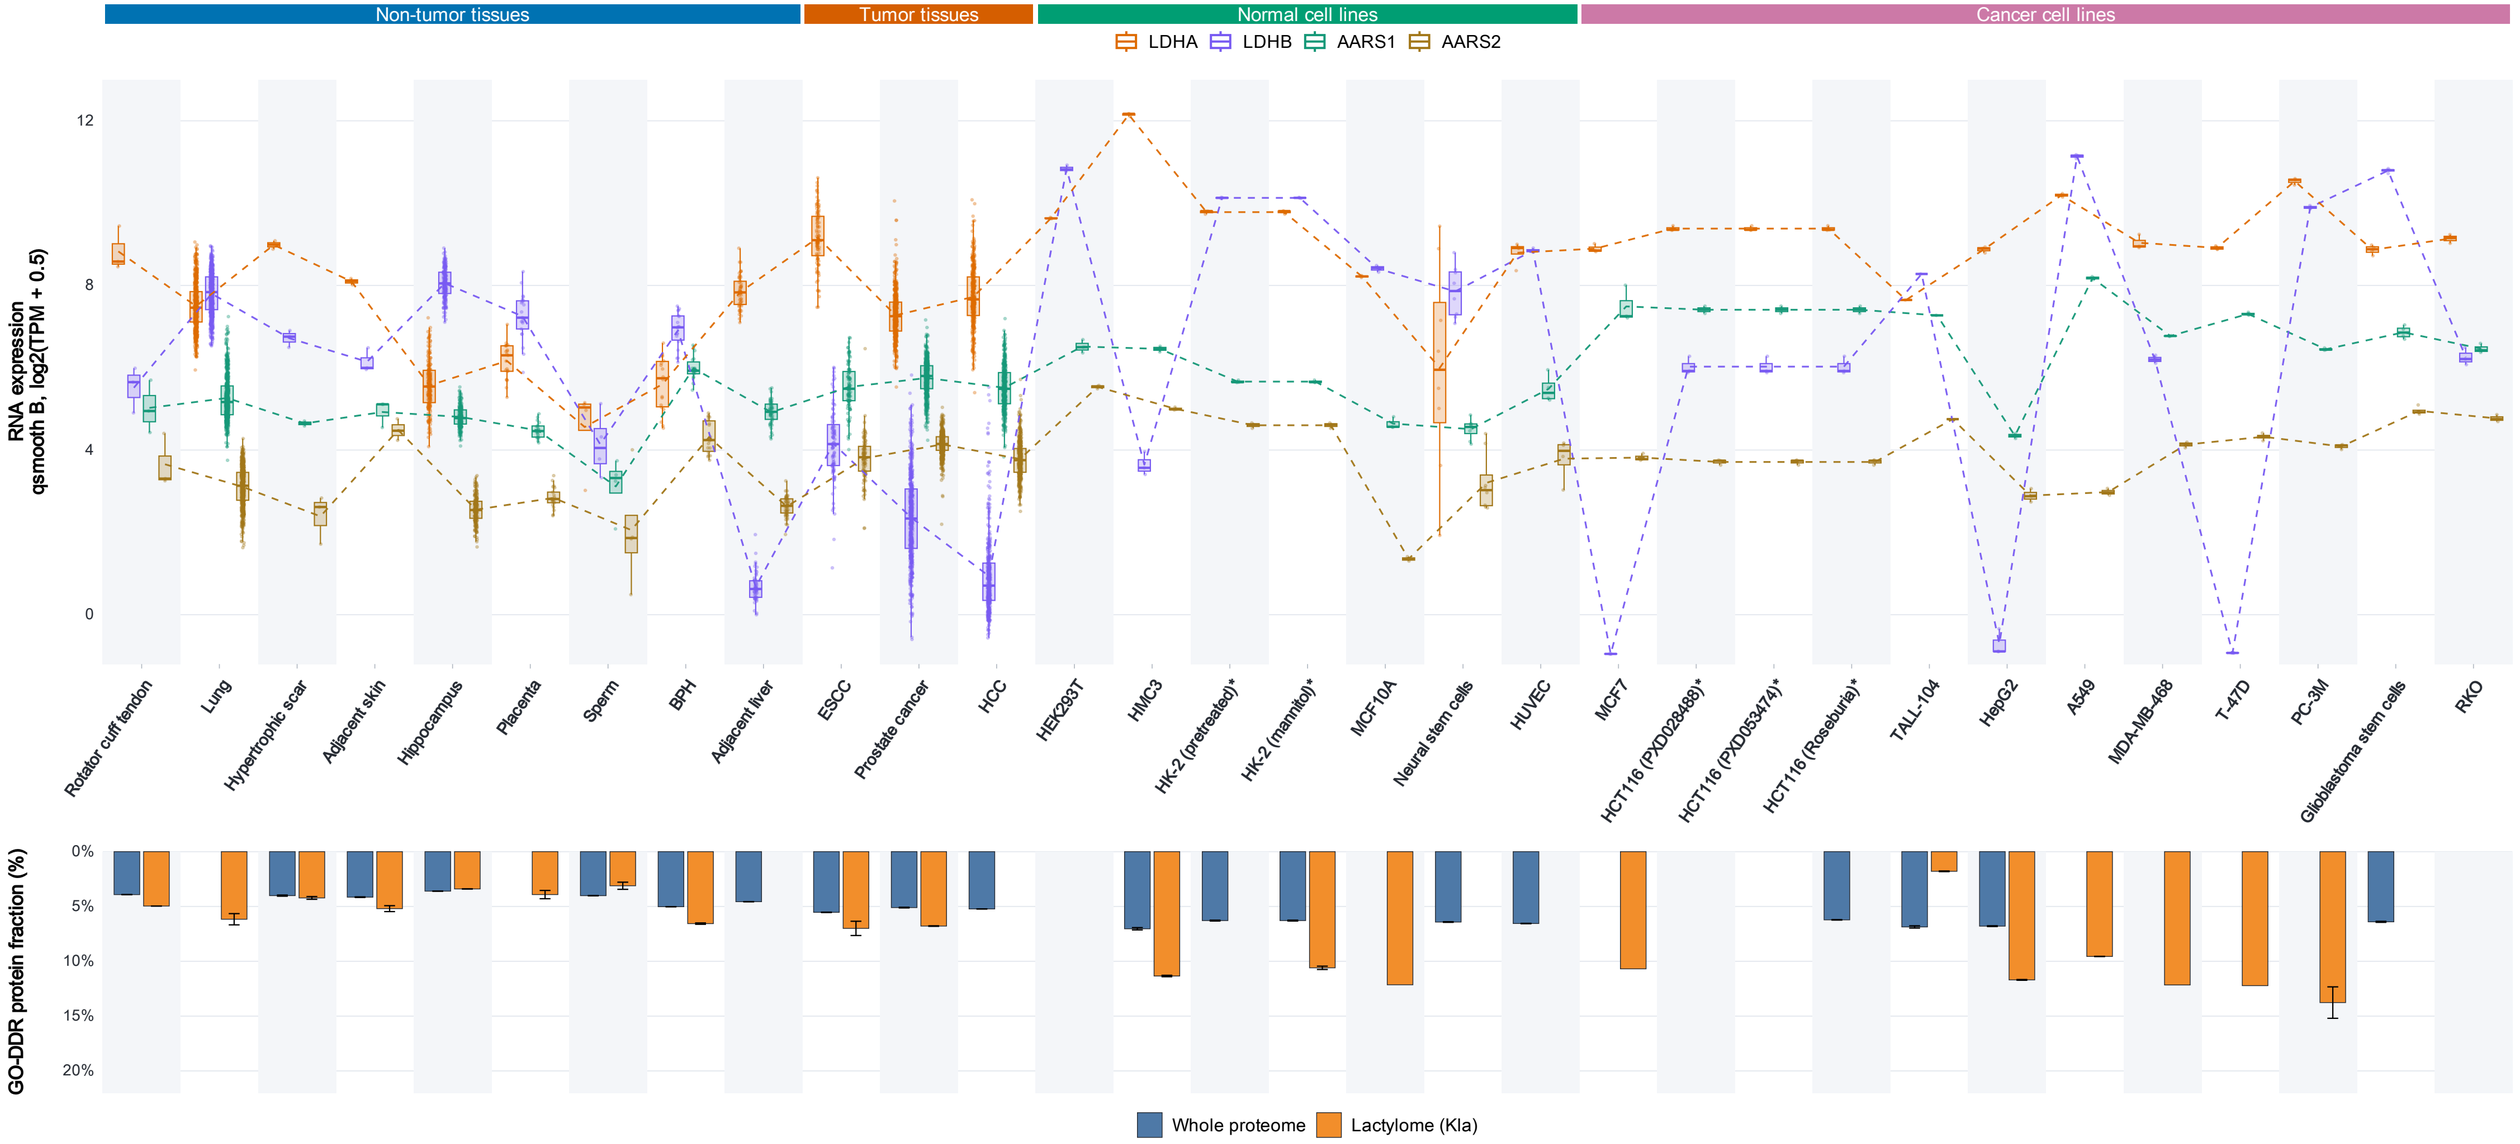

* Shared RNA reference: HCT116 (3 columns), HK-2 (2 columns). 31 display columns correspond to 28 RNA references; reference cohorts and conditions are listed in the mapping table.

Lactate metabolism / KAT-family lactyltransferases and DDR protein fractions

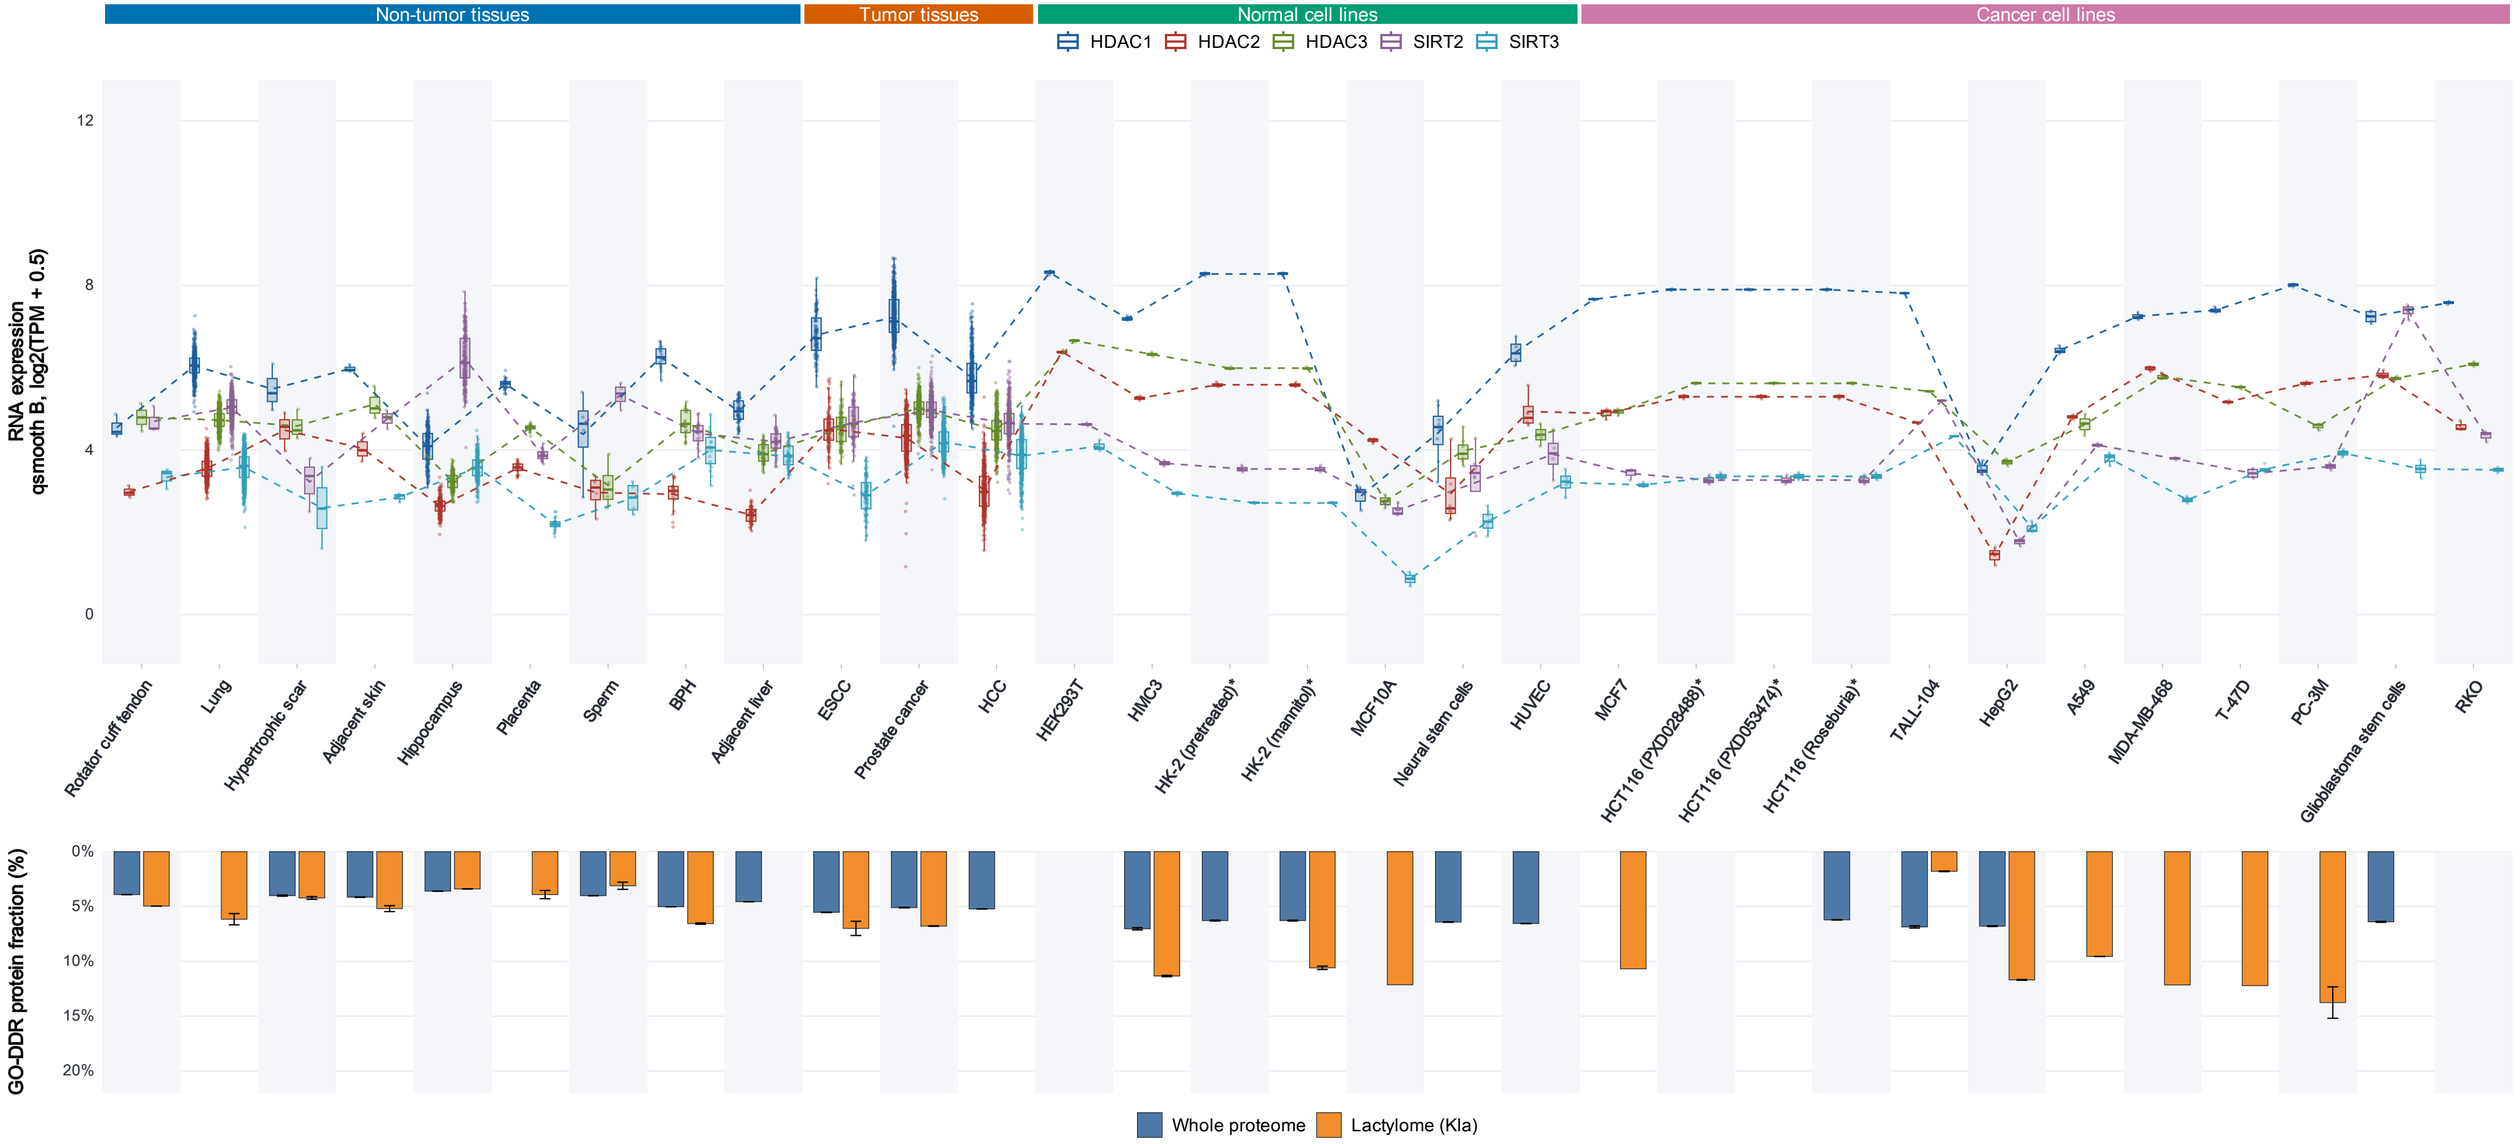

RNA: boxes show median and IQR; whiskers extend to 1.5 x IQR. Points are sample records; dashed lines connect material-level means.
DDR: downward bars show mean percentages; error bars show SEM (n > 1). Blank positions indicate no sample-level observation for that modality.
* Shared RNA reference: HCT116 (3 columns), HK-2 (2 columns). 31 display columns correspond to 28 RNA references; reference cohorts and conditions are listed in the mapping table.

Lactate metabolism / AARS lactyltransferases and DDR protein fractions

RNA: boxes show median and IQR; whiskers extend to 1.5 x IQR. Points are sample records; dashed lines connect material-level means.
DDR: downward bars show mean percentages; error bars show SEM (n > 1). Blank positions indicate no sample-level observation for that modality.
* Shared RNA reference: HCT116 (3 columns), HK-2 (2 columns). 31 display columns correspond to 28 RNA references; reference cohorts and conditions are listed in the mapping table.

Delactylation-associated regulators and DDR protein fractions

RNA: boxes show median and IQR; whiskers extend to 1.5 x IQR. Points are sample records; dashed lines connect material-level means.
DDR: downward bars show mean percentages; error bars show SEM (n > 1). Blank positions indicate no sample-level observation for that modality.
* Shared RNA reference: HCT116 (3 columns), HK-2 (2 columns). 31 display columns correspond to 28 RNA references; reference cohorts and conditions are listed in the mapping table.
